**Profile**

I am a dedicated learner with a **3.85 GPA** who is eager to explore different aspects of computer science. My main interest is **machine learning and AI**. I'm constantly researching and learning through online courses and application new things related to AI. I am seeking an internship to apply my knowledge in a professional setting and **help the country grow technologically**.

---

**Programming Languages and Tools****Libraries and Frameworks**

- PyTorch, Matplotlib, ScikitLearn, Jupyter Notebook, Pandas
- React
- Git, Github

**Programming Languages**

- Python
- TypeScript
- SQL (PostgreSQL, MySQL)
- Java

**AI Knowledge**

- Random Forest, Bayes Classification, Multiple Linear Regression, KNN, K-means Clustering
  - CNN, RNN, Transformers
  - Data cleaning and normalization
- 

**Education , Experience, and Volunteer Work**

- BAU Bachelor of Computer Science (2023-2026)
  - IDS React Internship ( April- June 2025)
  - CTF Semicolon Competition (July 2025)
  - BAU Build, Apply, Understand AI Summer Camp volunteer ( August 2025)
  - LCPC Volunteer (October 2025)
- 

**Languages**

- Arabic (native proficiency)
  - English (fluent)
  - French (intermediate)
- 

**Projects****- Grade prediction based on student habits**

I used a open-source data set on **Kaggle** to train a model using **multiple linear regression** while applying necessary steps like data cleaning and normalization to predict a student's test performance based on previous habits.

**- Learning Management Website**

I used **React** and **MySQL** to build an effective Learning Management Website.
